

## Stewart Signs Limited – Environmental Policy

---

Stewart Signs Limited are a respected leader in the printing industry, and are committed to providing professional printed products, services and installation of self-adhesive graphics and signage, primarily for the UK road fleet, rail, and marine sectors.

We are committed in operating a programme of continual improvement in our environmental performance and pollution prevention, aiming to minimise the environmental impacts resulting from our activities. We will make this possible through responsible monitoring, processing and recycling of waste, minimising the use of natural resources, and the continued research into sustainable processes, equipment and materials used in the manufacturing of our products and services.

We have made a commitment to net zero on the UK SME Climate Hub and will publish our sustainability statement showing our progress on an annual basis.

We will ensure that the company complies with all relevant environmental legislation, regulations, and any other requirements to which the company subscribes. When deemed necessary, external expertise will be sought to ensure relevant compliance is achieved.

We have process led systems and procedures in place to control and reduce atmospheric emissions, the consumption of energy and minimise waste, reusing and recycling where practical.

Improvements in our environmental performance will be achieved and externally verified through our BS EN ISO 14001 environmental management system: identifying and implementing improvement opportunities to enhance our environmental performance.

This policy has been communicated to all employees and contractors; it is also available to all interested parties on request from the company office at Chandler’s Ford Industrial Estate, Eastleigh.

Signed

Gareth Livingstone (CEO)
